

PRESS RELEASE

8th November 2021 - FOR IMMEDIATE RELEASE

Pecorama Indoor Play Equipment moving to Seaton Tramway

Statement from Peco as follows:

“There is some exciting news for you all especially parents with young children!

In January, Pecorama made the difficult decision to sell the famous and much-loved soft play equipment as the space was needed for manufacturing - Model railways have become increasingly popular, and expansion was needed. Since then, many people have expressed their disappointment and querying where the equipment has gone.

Well, the very good news is that we can confirm that Seaton Tramway now owns the equipment and hopefully it will all be installed and ready for use during next year. We are delighted that it has remained nearby and will once again be enjoyed by local families.”

Statement from Seaton Tramway as follows:

“Seaton Tramway is happy to announce that it has acquired the popular Soft Play equipment from Pecorama.

The equipment, formerly known as ‘The Play Station’, is now in ownership of popular East Devon attraction, Seaton Tramway and is currently in storage as the charity actively searches for a new space for the equipment.

Seaton Tramway is grateful to Pecorama for giving the opportunity to purchase the play equipment and looks forward to reopening the offer and keeping it within East Devon”

About Peco:

Peco is a family run business that has been manufacturing model railway products for railway enthusiasts since 1946. It is also home to Pecorama a popular tourist attraction in Devon and home to the Beer Heights Light Railway and beautiful gardens. For more information, call 01297 21542 or visit www.peco-uk.com or www.pecorama.info

About Seaton Tramway:

For the past 51 years Seaton Tramway has been Seaton Station for three miles inland through Colyford to Colyton, much of it along the former Seaton to Seaton Junction branch line between the picturesque estuary of the River Axe and the Axe Estuary Wetlands. An all-weather attraction with 14 single and double-deck electric trams. www.tram.co.uk
